Education

- **Sylhet Engineering College** — Sylhet, Bangladesh
  Bachelor of Science - Computer Science and Engineering — *Feb 2014 - Nov 2018*

Skills Summary

- **Android**: Kotlin, Jetpack Compose, Android SDK, Jetpack Navigation, Room, WorkManager, Services, Media APIs.
- **Architecture**: MVVM, MVI, Clean Architecture, Modularization, Offline-First Architecture
- **Async & Networking**: Kotlin Coroutines, Kotlin Flow, Retrofit, gRPC, MQTT, WebRTC.
- **Dependency Injection**: Hilt, Dagger2, Koin
- **Testing & Quality**: JUnit, Mockk
- **Cross-platform**: Flutter, Dart, Kotlin Multiplatform (KMP), Compose Multiplatform
- **Tools**: Git, Firebase, CI/CD, Jira

Experience

- **Brain Station 23 PLC.** — Mohakhali, Dhaka
  Sr. Software Engineer — *Aug 2024 - Present*
  - Modernized a legacy Java-based Android codebase into Kotlin and Jetpack Compose, measured by 30% of legacy screens migrated and a 20% reduction in crash rate, by leading the migration strategy and establishing reusable Compose UI components across the app.
  - Improved feature delivery velocity by introducing reactive state management patterns and a shared component library adopted across the team.
  - Delivered PrimePay's secure role-based payment workflow (Maker, Checker, Authorizer) for enterprise fintech clients, measured by multiple successful QC/UAT cycles, by pairing closely with QA and Product team.

- **Nybsys** — Mirpur, Dhaka
  Sr. Software Engineer — *Feb 2022 - Aug 2024*
  - Led Android development of Sentra PTT, a real-time push-to-talk platform, measured by successful technical demos delivered to multiple enterprise clients, by architecting voice communication using WebRTC, MQTT, and gRPC.
  - Built resilient real-time messaging architecture, measured by stable performance across multiple live enterprise demo sessions, by implementing fault-tolerant background audio handling and reliable message delivery under demo conditions.
  - Enhanced platform capability ahead of client evaluations, measured by positive technical feedback from prospective enterprise buyers, by integrating AI-powered interactive voice assistance and automatic conversation summarization.

- **Bdjobs.com** — Kawranbazar, Dhaka
  Mobile Application Developer (Sr. Executive) — *Mar 2021 - Feb 2022*
  - Grew engagement on a 1M+ user Android app by a 15%, by shipping Live Interview, Resume Dashboard, and Video Resume features end-to-end.
  - Improved release quality, measured by a 20% reduction in post-release defects, by leading code review practices across the team.
  - Delivered the Uddokta app from zero to production, measured by 2k+ SME users onboarded, by architecting it from scratch in Flutter with automated unit tests to support rapid iteration.

- **ITmedicus** — Demra, Dhaka
  Android Application Developer — *Aug 2019 - Feb 2021*
  - Modernized Patient Aid from Java to Kotlin with an offline-first MVVM architecture, measured by contributing to 1M+ downloads and a 4.5-star Play Store rating, by rebuilding core data layers for reliability on unstable networks.
  - Improved app performance, measured by a 30% improvement in startup and loading time, by optimizing networking, caching, and local storage strategies.
  - Maintained zero critical security issues in production across multiple healthcare apps, measured by 5 apps shipped, by architecting secure, scalable Android and Flutter solutions and enforcing unit test coverage on sensitive data flows.

Projects

- **Cockpit** Retail App, GrameenPhone (Android)

  Modernizing a large-scale legacy retail platform, measured by 10+ modules migrated / 30% reduction in tech debt, by rebuilding the UI with Jetpack Compose and driving modular architecture improvements for long-term scalability.

  Stack: Kotlin, Java, Jetpack Compose, Coroutines, Flow, Retrofit, MVVM/MVI, Modular Architecture.

- **PrimePay** Corporate Fintech App, Prime Bank (Flutter)

  Led production rollout of enterprise payment workflows (FT, BEFTN, RTGS, BillPay, MFS, Cheque Management), measured by successful QC/UAT cycles / zero critical incidents, by coordinating with QA and product through Clean Architecture (MVI) and rigorous release gating.

  Stack: Flutter, Dart, Riverpod, Dio, REST APIs, Firebase, Clean Architecture (MVI).

- **Bhakti365** Lifestyle Platform, Personal (KMP + CMP)

  Built a cross-platform spiritual lifestyle app, measured by 3 platforms supported, by designing shared business logic and UI in Kotlin Multiplatform & Compose Multiplatform to eliminate platform-specific duplication.

  Stack: Kotlin Multiplatform (KMP), Compose Multiplatform, Coroutines, Flow, Clean Architecture, MVI.

- **Sentra** Communication App, NybSys (Android)

  Scaled real-time push-to-talk and voice features by building on WebRTC and MQTT with AI-powered voice assistance and automatic summarization.

  Stack: Kotlin, Java, WebRTC, MQTT, gRPC, Coroutines, RxJava, MVVM, MVP.

- **Bdjobs** Job Portal, Bdjobs (Android)

  Delivered Resume Dashboard, Live Interview, and Video Resume for a 1M+ user platform, measured by 15% engagement growth, by building real-time communication features on a scalable MVVM architecture.

  Stack: Kotlin, WebRTC, Socket, Retrofit, Room, Coroutines, MVVM.

- **PatientAid** Healthtech, ITmedicus (Android)

  Migrated a legacy Java codebase to Kotlin, measured by contributing to 1M+ downloads and a 4.5-star rating, by rebuilding on offline-first MVVM architecture with WorkManager for reliable background sync.

  Stack: Kotlin, Room, Retrofit, WorkManager, Coroutines, MVVM, Offline-first Architecture.
