EDUCATION

- Sylhet Engineering College** Sylhet, Bangladesh
Bachelor of Science - Computer Science and Engineering Feb 2014 - Nov 2018

SKILLS SUMMARY

- Android:** Kotlin, Jetpack Compose, Android SDK, Jetpack Navigation, Room, WorkManager, Services, Media APIs.
- Architecture:** MVVM, MVI, Clean Architecture, Modularization, Offline-First Architecture
- Async & Networking:** Kotlin Coroutines, Kotlin Flow, Retrofit, gRPC, MQTT, WebRTC.
- Dependency Injection:** Hilt, Dagger2, Koin
- Cross-platform:** Flutter, Dart
- Tools:** Git, Firebase, CI/CD, Jira

EXPERIENCE

- Brain Station 23 PLC.** Mohakhali, Dhaka
Sr. Software Engineer Aug 2024 - Present
 - Contributing to the modernization of legacy Android applications by migrating Java-based codebases to Kotlin and Jetpack Compose with scalable architecture and reactive state management patterns.
 - Built modern, maintainable UI components using Jetpack Compose, improving development scalability and user experience consistency.
 - Led development of PrimePay, delivering secure role-based payment workflows (Maker, Checker, Authorizer) for enterprise fintech users.
 - Collaborated closely with product, QA, and engineering teams to ensure release readiness, stability, and high-quality feature delivery across multiple environments.
- NybSys** Mirpur, Dhaka
Sr. Software Engineer Feb 2022 - Aug 2024
 - Led Android development of Sentra PTT, a real-time Push-to-Talk platform supporting voice communication using WebRTC, MQTT, and gRPC.
 - Built scalable real-time communication features with background audio handling and reliable messaging architecture for enterprise-grade usage.
 - Integrated AI-powered capabilities, including interactive voice AI and automatic conversation summarization to enhance user productivity and communication workflows.
 - Took ownership of critical features, performance optimization, and production reliability in a fast-paced product environment.
- Bdjobs.com** Kawranbazar, Dhaka
Mobile Application Developer (Sr. Executive) Mar 2021 - Feb 2022
 - Enhanced the Bdjobs Android app (1M+ users) by delivering high-impact features, including Live Interview, Resume Dashboard, and Video Resume.
 - Led mobile development initiatives, collaborated with cross-functional teams, reviewed implementations, and improved post-release quality by reducing defects by 20%.
 - Improved user engagement by 15% through product-focused feature enhancements and performance improvements.
 - Architected and delivered the Uddokta app from scratch using Flutter, enabling SME entrepreneurs to manage hiring workflows efficiently.
- ITMedicus** Demra, Dhaka
Android Application Developer Aug 2019 - Feb 2021
 - Migrated Patient Aid from Java to Kotlin using MVVM and offline-first architecture, contributing to 1M+ downloads and a 4.5* Play Store rating.
 - Architected and delivered multiple healthcare applications from scratch using Android and Flutter with secure, scalable, and maintainable implementations.
 - Improved application startup and loading performance by 30% through optimization of networking, caching, and local storage strategies.
 - Collaborated with product and business stakeholders to deliver stable healthcare solutions with zero critical security issues in production.

PROJECTS

- **Cockpit Retail** (Retail App, GrameenPhone - Android - [\[Link\]](#))

Contributing to the modernization of a large-scale legacy retail platform into a scalable, modular Android application focused on maintainability, performance, and long-term product scalability.

Implemented modern UI systems using Jetpack Compose and contributed to architecture improvements for better developer productivity and feature delivery.

Tech & Architecture: Kotlin, Java, Jetpack Compose, Coroutines, Flow, Retrofit, MVVM, MVI, Modular Architecture.

- **PrimePay** (Corporate Fintech App, Prime Bank - Flutter)

Led development and production rollout of secure enterprise payment workflows supporting FT, BEFTN, RTGS, BillPay, MFS, and Cheque Management.

Collaborated closely with QA, product, and business teams to ensure stable releases across QC, UAT, and production environments.

Tech & Architecture: Flutter, Dart, Riverpod, Dio, REST APIs, Firebase, Clean Architecture (MVI).

- **Bhakti365** (Lifestyle Platform, Personal - KMP+CMP - [\[Link\]](#))

Built a modern Hindu lifestyle platform focused on delivering a personalized daily spiritual experience across platforms using Kotlin Multiplatform.

Designed reusable shared business logic and scalable architecture to support long-term cross-platform product development.

Tech & Architecture: Kotlin Multiplatform (KMP), Compose Multiplatform, Coroutines, Flow, Clean Architecture, MVI.

- **Sentra** (Communication App, NybSys - Android - [\[Link\]](#))

Built and scaled real-time Push-to-Talk and voice communication features for enterprise users using WebRTC and MQTT-based messaging systems.

Integrated AI-powered capabilities, including interactive voice AI and automatic conversation summarization to improve communication workflows and productivity.

Tech & Architecture: Kotlin, Java, WebRTC, MQTT, gRPC, Coroutines, RxJava, MVVM, MVP.

- **Bdjobs** (Job Portal, Bdjobs - Android - [\[Link\]](#))

Delivered product-focused features, including Resume Dashboard, Live Interview, and Video Resume for a platform serving 1M+ users.

Contributed to engagement improvements and platform reliability through scalable Android architecture and real-time communication features.

Tech & Architecture: Kotlin, WebRTC, Socket, Retrofit, Room, Coroutines, MVVM.

- **PatientAid** (HealthTech, ITmedicus - Android - [\[Link\]](#))

Migrated a large legacy Java codebase to Kotlin with offline-first architecture and scalable MVVM design patterns, contributing to 1M+ downloads and a 4.5* Play Store rating.

Improved application performance, reliability, and maintainability while supporting secure healthcare workflows.

Tech & Architecture: Kotlin, Room, Retrofit, WorkManager, Coroutines, MVVM, Offline-first Architecture.
